INFORMATION DISCLOSURE STATEMENT

Dear Sir:

In connection with the above-entitled matter, Applicants hereby attach U.S. Patent Office forms PTO-1449 and PTO-892, including copies of the references listed therein not already of record in the parent application. The present application is a Continuation under 37 CFR 1.53(b) of application Serial No. 09/814,086, wherein some of the references referred to in the enclosed U.S. Patent Office Forms PTO-1449 and PTO-892 have been previously submitted or cited. Accordingly, it is respectfully submitted that no copies of the previously cited references are believed necessary. However, some of the references were cited in a Japanese Office Action dated September 3, 2003, of the counterpart Japanese patent application. Enclosed is a copy of the Japanese Office Action. An English translation of the relevant portions thereof will be forthcoming. The claims in the present application are believed to be patentably distinguished over these references.

This information disclosure statement is being made pursuant to the duty of disclosure imposed by law and formulated in 37 CFR 1.56(A). No representation is made that the

information thus disclosed in fact constitutes prior art or that it is the closest prior art, inasmuch as 37 CFR 1.56(A) relies on a materiality concept which depends on subjectivity.

In compliance with the requirements of 37 CFR § 1.98(a)(3), as a concise statement of relevance, as it is presently understood by the individual designated in 35 USC § 1.56(c) most knowledgeable about the content of the information, the undersigned attorney of record submits that the relevance to the pending U.S. patent application is that some of the references were cited in the U.S. parent patent application.

Further with regard to the foregoing, the undersigned attorney of record also submits a translation of portions of an official action (not previously of record in the U.S. parent application) by a foreign examiner in which the references were cited. The relevance to the pending U.S. patent application is that the references were cited in a foreign patent application on the same subject matter. However, no independent analysis of any of the references, or of the accuracy of the statement of foreign examiner or the claims of the foreign application under the laws of the country or the United States relative to the subject matter claimed in the present application has been made; the present understanding of the contents thereof by the undersigned being based on the translation of the foreign examiner's comments submitted therewith.

In the event there are any fee deficiencies or additional fees are payable, please charge them (or credit any overpayment) to our Deposit Account No. 08-1391.

Respectfully submitted,
